## **SREB Data - South Carolina's Per Student Funding Compared to SREB States**

SREB compiles comparable data from each of the 16 member states. Educational and general operating funds include state and local tax revenues allocated to colleges and universities for operating expenses related to higher education; other funds, such as earnings from state-funded endowments, used for operating purposes; earmarked revenues, such as from lotteries, used for operating purposes; and tuition and fee revenues. Excluded are funds appropriated for capital construction and debt payments, non-instructional community-service activities, cooperative extension and experiment stations, medicine and health-professions education programs (including teaching hospitals and schools of veterinary medicine), statewide financial aid programs for students, statewide coordinating and governing boards and private colleges and universities.
